Hazmat  
Transportation  
General Awareness  
Training for \$25 ?

U.S. Department of Transportation

# Who needs hazmat training?

employees who perform work functions covered by the Hazardous Materials Regulations (HMR; 49 CFR Parts 171-180). Any employee who works in a shipping, receiving or material handling area or who may be involved in preparing or transporting hazardous materials is required to have training.

Current U.S. Department of Transportation (USDOT) regulations require training (and retraining) of all

USDOT CD-ROM includes 7 training modules:

MOD 1 - The Hazardous Materials Table  
MOD 2 - Shipping Papers  
MOD 3 - Packaging  
MOD 4 - Marking and Labeling  
MOD 5 - Placarding  
MOD 6A - Carrier Requirements (Highway)  
MOD 6B - Carrier Requirements (Air)

*Bonus Publication:  
How to Use the Hazardous Materials Regulations*

## What new training is available?

Interactive CD-ROM, multi-media computer based technology allows you to turn training into an exciting educational experience. USDOT's Interactive CD-ROM training allows a new employee to become a contributing member of your team long before they could using traditional training methods. Students can adapt the training to their needs by repeating lessons they find new or complex, and by moving quickly through lessons that they understand.

## How can this training be used?

With interactive training modules, you can individually train your employees without disrupting your operations. You can train employees as their work schedule permits and allow them to learn at their own pace. USDOT's 97/98 CD-ROM hazmat training combines text, graphics, testing, and narration in an interactive format. Students listen to the narrator discuss the issues with supporting graphics. At regular intervals, the user is quizzed on the content, and the subject matter may be reviewed when questions are answered incorrectly. The CD-ROM allows you to maintain a permanent record of all users and the results of their testing. The CD-ROM training will not replace instructor-led courses. In fact, it supports it by providing files for creating transparencies, prints or slides which may be used for group training presentations. Instructor and student manuals (including tests and answer keys) may also be easily printed from the CD-ROM.

**Available August 1, 1998
